## PROFILE

I'm front-end engineer with more than 5 years experience. I like CSS and Javascript (recently have added Typescript into my arsenal), like writing both useful and not too much code in my free time. I'm a big fan of open source projects. Sometimes I work with Node.js and Ruby/Rails. Take a moment to explore crazy stuff from the web world.

## EXPERIENCE

FRONT-END LEAD ENGINEER, REVEALBOT, USA, 2018-PRESENT

I've responsible for client part of huge distributed application that provides convenient tools that automate ad management strategies for popular ad platforms such Facebook/Google etc. Core technologies are Vue, Vuex, JSX, Styled-components, Webpacker, Ruby on Rails.

FRONT-END ENGINEER, CINARRA SYSTEMS, RUSSIA, 2017-2018

I've responsible for front-end part of huge RTB application. This part allows clients to form an advertising company, specify the target audience and also monitor its effectiveness on the basis of multiple metrics. Core technologies are React, Redux, Recompose and other FP stuff.

FRONT-END DEVELOPER/LEAD DEVELOPER, FLATSTACK, RUSSIA, 2013-2017

I was responsible for front-end part of different projects with different complexity and field of activity. Here at different time I was a part of 3-10 people size teams which provide full development cycle. I've tried popular FE-frameworks like React, Angular, Backbone/Marionette, also gained experience in varying degrees with technologies such as Node.js on BE, Cordova/Phonegap as mobile framework.

FRONT-END DEVELOPER, DARING AND YOUNG, RUSSIA, 2012-2013

I was responsible for front-end work of websites. Most projects were on Backbone.js and jQuery. Was mostly focused on markup.

## EDUCATION

2013-2015 Russia, Kazan State University. Master's degree in computer science.

2009-2013 Russia, Kazan State University. Bachelor's degree in computer science.
